

FACT SHEET

iOS MOBILE AWARE

Inspection Data. Made Easy.

Mobile Aware, our mobile field inspection Total Quality Assurance solution, allows you to capture inspection findings electronically while the inspection is taking place or retrieve data from historical inspections – saving time and reducing errors.

Key Benefits

- Save significant time, increase data accuracy and eliminate the need for additional data entry
- Dramatically improve field inspection and walk-down productivity
- Easily collect data, capture photos and document reports
- Optimize field inspection time while on-site using iOS Mobile Aware
- Access iOS Mobile Aware in the Apple App Store

Inspector Benefits

- Save time with faster and more accurate data collection
- Carry required documentation inside the boiler
- Automatically link photos to the correct record
- Calculate remaining life
- Utilize smart pick-lists for easier selection of required actions
- Validate data at source

Planners/ Managers/ Engineers Benefits

- Inspectors can spend more time inspecting and less time writing reports
- Quickly access post-inspection reports to expedite necessary boiler-related activities
- Collect comprehensive data for future outage planning
- Track the status of each action item
- Eliminate the admin role for data entry

Company Benefits

- Utilize a consistent reporting format across the fleet
- Easily analyze data using well-defined found conditions and required actions
- Access near real-time available data from the corporate office
